**PROPOSITIONS TO IMPROVE THE PREVENTATIVE
MANAGEMENT OF DESERT LOCUSTS BASED ON NEW
KNOWLEDGE OF ITS ECOLOGY**

par

Koutaro Maeno

JIRCAS, Tsukuba, Jpn.

🔍 The Desert locust is one of the most destructive pests in the world especially in Africa. We can control them with pesticide, but it causes environmental pollution.

🔍 I will introduce how people control locust swarm in Africa and how field research to understand ecology can contribute to develop environmental-friendly control techniques.
